Operates on Free Solar Renewable Energy

Progress Solar™ Light Tower (SLT™ Series)

Progress Solar™ Light Towers are a series of rugged, mobile outdoor light systems that provide high-intensity, bright white lighting on-demand, where and when you need it. Each model offers 2 independent solar off-grid systems that are durable and built to perform; they are equipped with high quality solar power arrays (600w, 800w or 1200w options); high-lumen LED flood lights; and long-life, deep-cycle batteries (flooded or AGM, no maintenance options). The light tower is fully adjustable from 12-30ft in height. Lights can be tilted up/down and rotated individually, and the mast can be rotated. The 4 solid-state, high intensity, LED flood lights provide a tremendous amount of light with very little power required; instant-on/off with no flickering; extremely reliable, vibration and shatter resistant; and designed to provide up to 5x longer run time between changes than metal halide lights. The maximum power point tracking solar controllers protects the batteries from over/under charging and the lights can be automatically timer controlled to turn on/off with manual override capabilities. The systems are in industrial quality housing on a portable trailer that can be easily towed to its destination. An optional wind power generator is also available.

- **No Noise or Diesel Smell – Just Great Light, Complete Silence and Fresh Air!**
- **No Diesel Fuel Required – Eliminates Expensive Fuel Costs & Time Consuming Trips**
- **No Limits – Built for Light-On-Demand for Applications Requiring a Durable Solution**
- **No Engine Maintenance – Convenient, Saves Time & Money**
- **No Frequent Light Bulb Changes – LED Lights Last up to 5x Longer than Metal Halide**
- **No Fossil Fuels (Carbon Dioxide) – Just Free, Renewable Energy From The Sun!**
- **No Financial Downside – Competitive Price – Significantly Reduced Operating Cost -**

Great Federal & State Solar Incentives May Apply

Ideal for

Lighting Night Time Operations or Outdoor Events

Construction & Work Sites – Airports - Security & Emergency - Parking
Sports / Events – Recreation - Camp Sites – Golf – Raceways – Theme Parks - Fairs
Military Operations – Disaster Recovery – Mining – Oil & Gas - Utilities

Anywhere a Light-On-Demand Application is Needed
